

PHONE-A-STAT™ - Temperature & Appliance Control

Leading Edge Design

Control your furnace/air conditioning with your telephone

- ▶ The Phone-A-Stat™ includes a Command Center and a digital thermostat. Use your cell phone or any telephone to call your Phone-A-Stat and control your furnace or any other appliance in your home or office.

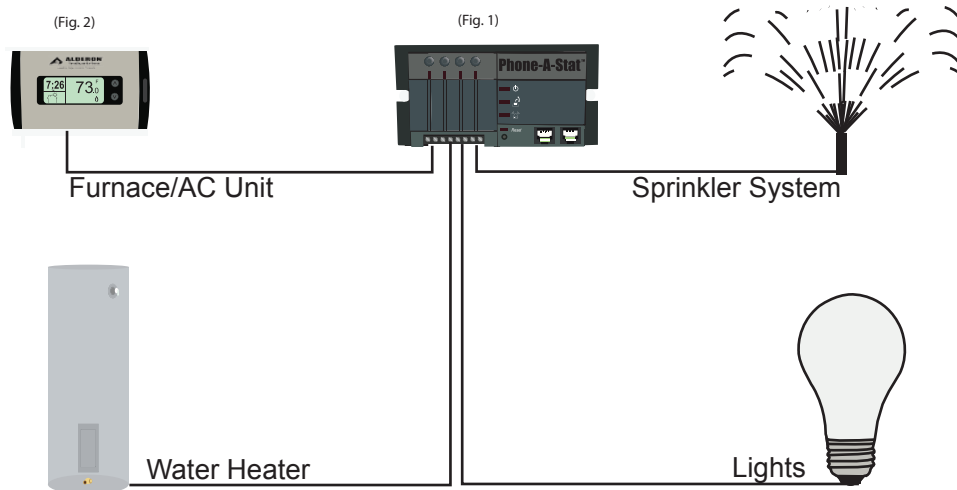

Works with many different heating and cooling systems.

- ▶ The Phone-A-Stat works with gas, fuel oil, electric furnaces, central air, hot water systems with or without pumps, millivolt systems and combination central heating and cooling systems.

Applications

Control your thermostat plus three other household devices from a touch-tone phone or cell phone.

When you call the Phone-A-Stat you can change the temperature in your home or active other equipment. You can also manually operate this equipment with the switches on the command center.
